To Whom It May Concern

Almere, September 12<sup>th</sup>, 2022

**REFERENCE: NRS097-2-1 Certification MultiPlus-II 8kVA-15kVA, Quattro-II 5kVA**

The Victron MultiPlus-II 3kVA and 5kVA have been in the South African market for several years now and both carry certification against the South African grid code as defined in NRS097-2-1.

The newer Victron MultiPlus-II 8kVA-15kVA and the Quattro-II 5kVA are built upon the same hardware platform and include the same anti-islanding mechanisms. Unfortunately, because of the testing backlog\* at the European testing agencies, Victron is still waiting for the compliance certifications for these products.

We can confirm that the testing for the products is in progress, and we expect certification soon. In the meantime, we ask that you to consider this letter as interim proof of compliance until such time as the certificates are available on the Victron website.

With kind regards,  
VICTRON ENERGY B.V.  
  
Reinout Vader  
Managing Director
